Professional Summary

Software Engineering student and MERN Stack Developer with practical experience building responsive, database-driven, and full-stack web applications. Experienced in React.js, Node.js, Express.js, MongoDB, JavaScript, TypeScript, RESTful APIs, authentication systems, and Progressive Web Applications. Experienced in both freelance development and professional software development environments, with a focus on building scalable and user-focused digital solutions.

Education

Bachelor of Science in Software Engineering **2023 – Present**

University of Gujrat, Gujrat, Pakistan 7th Semester

Professional Experience

Software Development Intern **July 2026 – Present**

Vision Bird Technologies, Gujrat, Pakistan

- Developing practical web applications while applying modern full-stack development and software engineering practices.
- Developed a MERN-based authentication and authorization application featuring user registration, login, JWT authentication, protected routes, and RESTful API integration.
- Integrated React.js frontend applications with Node.js, Express.js, and MongoDB backend services.
- Currently developing a Progressive Web Application for automated cheque filling, structured data entry, and print-ready document generation.
- Participating in debugging, testing, API integration, responsive interface development, and feature implementation.

Freelance Web Developer **2024 – Present**

Independent / Remote

- Designed and developed responsive websites and web interfaces according to client requirements and project specifications.
- Developed frontend interfaces using React.js and modern JavaScript-based development practices.
- Implemented reusable components, responsive layouts, API integrations, and interactive user interfaces.

Projects

01 Drivexa – Real-Time Vehicle Booking Platform

- Developing a full-stack vehicle booking platform designed for real-time vehicle reservations, customer management, and booking workflows.
- Building responsive interfaces for vehicle discovery, booking, user accounts, and reservation management.
- Structuring backend services to support dynamic pricing and route optimization.

Tech Stack: MongoDB, Express.js, React.js, Node.js, JavaScript, Tailwind CSS, REST APIs

02 MERN Authentication & Authorization Application

- Developed a complete full-stack authentication system with registration, login, logout, protected routes, and authorization.
- Implemented JWT-based authentication and connected the React frontend with RESTful backend services.
- Integrated MongoDB for persistent user data and authentication workflows.

Tech Stack: MongoDB, Express.js, React.js, Node.js, JavaScript, JWT, REST APIs

03 Cheque Auto-Filling Progressive Web Application

- Developing a PWA designed to automate cheque-filling workflows through structured data entry and accurate field positioning.
- Building reusable React components, responsive interfaces, and print-ready cheque generation functionality.
- Developing desktop and web capabilities to support an efficient document-processing workflow.

Tech Stack: React.js, Electron.js, TypeScript, Tailwind CSS, Vite, PWA Technologies

04 MERN SaaS Web Application

- Developed a full-stack SaaS application featuring responsive interfaces, reusable components, authentication, and database integration.
- Developed RESTful APIs connecting frontend features with backend services and persistent database storage.

Tech Stack: MongoDB, Express.js, React.js, Node.js, JavaScript, Tailwind CSS, REST APIs

05 Personal Developer Portfolio

- Designed and developed a responsive developer portfolio to showcase software projects, development experience, and technical work.
- Implemented reusable components, responsive layouts, interactive sections, and a modern interface optimized for multiple screen sizes.

Tech Stack: React.js, JavaScript (JSX), Tailwind CSS, Vite
